## FullStack Developer

kadamvidhya758@gmail.com • 8956321109 • Pune Maharashtra

### Work Experience

#### Exocoetus Software Pvt Ltd Pune

Designaton:: Software Developer

- Developing and implementing application features.
- Testing application functionalities to ensure quality.
- Fixing software bugs to improve system reliability.
- Integrating third-party APIs to enhance application capabilities.
- Participating in daily stand-up meetings to coordinate efforts.
- Optimizing performance and scalability for high-demand applications.
- Collaborate effectively with cross-functional teams to achieve project objectives and deadlines.

### Technical skill

- Java
- Java 8
- Spring Boot
- Hibernate/JPA
- JUnit
- Jenkins
- Git/GitHub
- AWS
- Microservices
- Angular 13
- HTML5
- CSS3
- Bootstrap
- MUI
- Tailwind
- Figma

### Education

#### B.Sc

Nutan Mahavidhyalaya, Selu

#### M.sc-

Swami Ramanand Teerth Marathwada University  
Nanded

### Professional Experience

Results-driven Software Developer with 2.4 years of experience in backend development using Java, Spring, and Spring Boot, as well as front-end expertise in React.js and CSS. Skilled in building responsive user interfaces and delivering seamless full-stack solutions. Proven track record of producing high-quality software in dynamic environments while staying updated with emerging technologies.

### projects

#### LoanPro

- Developed RESTful APIs for key loan management features such as loan applications, approval workflows, and reporting.
- Ensured code quality and scalability through rigorous testing and optimization.
- Implemented security measures to safeguard sensitive financial data.
- Used Spring Boot to automate and improve the lending process for financial institutions.
- Designed an intuitive interface for both borrowers and administrators.
- Worked closely with the team to ensure seamless integration and maintainable code.

#### EFFIWARE (Spring Boot)

- Designed and developed critical features to enhance the reliability and scalability of warehouse software.
- Utilized Spring Boot to streamline and optimize warehouse operations.
- Created a user-friendly interface for managing inventory, orders, shipments, and resources.
- Implemented robust solutions to adapt to evolving warehouse needs.
- Focused on improving overall operational efficiency and ensuring system performance and flexibility.

#### FinCorpX

- Provide a comprehensive solution for companies to manage their banking needs.
- Support essential banking functions such as wire payments, ACH, and account transfers.
- Ensure compliance with industry standards and business requirements.
- Offer a variety of configurations to handle daily business operations for banks and corporate users.
- Serve as a critical product in the corporate banking sector.
- Undergo migration to a next-generation platform as part of ongoing modernization efforts.
- Plan to modernize the remaining CBS products following the successful migration of FinCorpX.
